

Program Topics:

For Everyone:

- ◆ Why uncontrolled air leakage in a building is bad for both energy efficiency and IAQ

For Homes:

- ◆ The role of performance testing in homes for insuring both energy efficiency & IAQ.
- ◆ Case studies for super insulated homes, exhaust-only ventilation, and fully-ducted ventilation
- ◆ LEED for Homes Case Study

For Commercial:

- ◆ Green HVAC System Maintenance
- ◆ RetroCommissioning of Existing Buildings
- ◆ New Technologies and Practices for Achieving Energy Efficiency Without Compromising IAQ.
